February 2023

Our investment advisory activity

With the launch of the activities of our socio-industrial center for the extraction and refining of oils (peanut, baobab...) in Fimela/Djilor, the year 2023 promises to be rich in learning and challenges. Indeed, convinced by the innovative impact investment model developed by LSF Capital, many young entrepreneurs/private investors have come to meet LSF Capital's teams, notably in the framework of our investment advisory and financial engineering activities. During its two years of existence, LSF Capital has been able to accompany more than twenty private investors in their projects, thanks to its young and qualified investment team.

Development of a rice project in Djilor

Within the framework of its partnership with the G.I.E of women SALANE SEDAR of Djilor, the socio-industrial center Léopold SEDAR SENGHOR allocates a part of its refined peanut oil production to the DJIL'OR brand. This result has strengthened the bonds of trust with the community and led the G.I.E. to solicit LSF Capital for the development of a rice project. Thus, on January 13, 2023, the LSF Capital team visited the former rice fields of Djilor, which had been abandoned due to the rise in salt. Following these exchanges, a pilot phase on a perimeter of 40 hectares will be launched during the 2023 winter season.

Our strenght : our team

Since the start of the center's activities in December 2023, we have relied on a team of more than 20 young people from the district of Fimela (Djilor, Yayem, Ndangane camp, Fimela). The parity between men and women is almost respected in the center.

Our commitment to the town hall of Fimela and the women of Djilor is to train the youth of this community by promoting the emergence of future entrepreneurs in the field of industry.
